-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/01/2007 has been entered.
2. Claims 102-126, 154, 158-165, 167-169, and 171-175 are currently pending in this application. All of the claims have been amended by this Amendment.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 102-126, 154, 158-165, 167-169, and 171-175 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

At least independent claims 102, 154, 169, and 171 contain at least the newly added limitations, "third electrode .... downstream from the second electrode and having an ion emitter" and " ..... is triangular in shape", that have no proper support in the specification as

Art Unit: 1711

originally presented. It is noted that in the specification, the third electrode is upstream from the first electrode while the trailing electrode is downstream from the second electrode.

***Response to Arguments***

5. Applicant's arguments, filed on 02/14/2007, with respect to the rejection(s) of the claims over the prior art of record have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, the amended claims have raised new matter as noted above. Applicants are suggested to rewrite the claims to overcome this new matter.

6. It is noted that the Amendments are non-compliant because, in the Remarks, Applicants do not provide support for the new limitations in the claims. Applicants are required to indicate pages and paragraphs or lines, and items in Figures to provide support for the newly added limitations.
